Larissa Lima de Almeida dos Santos

Fullstack Web Developer · React / Next.js / Node.js / TypeScript

+55 (15) 98160-5571 | larissaalmeidalima9@gmail.com | Sorocaba, SP, Brazil · Open to remote
GitHub | LinkedIn | Portfolio | Lima Studio Web

PROFESSIONAL SUMMARY

Fullstack web developer focused on building fast, modern web applications across the full stack, from the database and API to a polished, responsive interface. Founder of Lima Studio Web, where I design, develop, and deploy custom websites and web systems for real clients using React, Next.js, and TypeScript. Backed by a solid foundation in Python, SQL, and AWS, and currently pursuing an MBA in Data Science & Analytics at USP/Esalq. Open to remote work under CLT, PJ/contract, or freelance.

CORE SKILLS

Frontend: JavaScript (ES6+), TypeScript, React, Next.js, HTML5, CSS3, Tailwind CSS, responsive / mobile-first design
Backend: Node.js (Express), REST APIs, SQL Server, relational data modeling, authentication
Languages & Data: Python (Pandas, NumPy), SQL / T-SQL, scikit-learn (ML fundamentals)
Cloud & DevOps: AWS (EC2, S3, Lambda), Git / GitHub, CI/CD (GitHub Actions), Vercel
Practices: Agile / Scrum, Git workflow, SEO, end-to-end project ownership
Also familiar with: Vue.js, Angular, Java, Docker, PostgreSQL
Languages: Portuguese (native), English (advanced), Spanish (intermediate)

EXPERIENCE

Lima Studio Web — Founder & Fullstack Developer 2026 – Present
Web studio · Remote

- Founded and run a web studio that delivers custom websites and web systems for real clients, owning every stage of the project: discovery, design, development, deployment, and ongoing support.
- Built and shipped **yoshis.com.br** for Yoshi's (Japanese restaurant, 30+ years): responsive site with photo gallery, delivery integration, and WhatsApp reservations in Next.js / React, deployed on Vercel.
- Delivered trilingual (PT / EN / ES) websites optimized for SEO and mobile-first performance.

Freelance Fullstack Developer — Agência CORE 2026
Branding & digital marketing agency · Remote

- Built and delivered the agency's institutional website (**coreag.com.br**): responsive, multi-page, light minimalist interface with cases and service sections, developed in Next.js / React and deployed on Vercel.

PROJECTS

Customer Behavior Analysis — ETL Pipeline Python · SQL

- Data pipeline in Python (Pandas) and SQL over transactional and customer data to surface purchasing patterns and segmentation. Code on GitHub.

Data Mining & Business Intelligence Python · scikit-learn

- Collection of data-mining projects in Python / Jupyter: energy-consumption forecasting, association rules (Apriori), customer segmentation (K-Means), and classification (Random Forest). Code on GitHub.

Predictive Cybersecurity Framework — MBA Research USP/Esalq

- Machine Learning framework for Industry 4.0 handling high-volume data pipelines for predictive vulnerability analysis.

EDUCATION

MBA in Data Science & Analytics — USP/Esalq Expected 2027
Advanced statistical modeling, Machine Learning, and Big Data strategy.

Associate Degree (Tecnólogo) in Systems Analysis & Development — Facens 2024
Software Engineering, database management (DBMS), and algorithm optimization.

CERTIFICATIONS

- JavaScript, Java, Python, and SQL for Data Analysis (Udemy).
